

OUR PROVEN PROCESSES WILL:

- Identify product strengths and weaknesses early in the process, saving you time, money and aggravation.
- Allow you to commit only to the steps you need, when you need them.
- Give you access to our team of design originators. They've used this same process to launch their own successful products and want to put their knowledge and experience to work for you.

In today's competitive global marketplace, good ideas can still thrive, but even the most seasoned visionaries face serious challenges along the way. Just one mistake can cost thousands of dollars and hours of wasted effort.

That's why Envision's process, refined over years of testing for dozens of products destined for commercial, medical, aerospace and industrial use, is the most efficient and cost-effective approach. It reveals solidly marketable product designs, efficient manufacturing solutions, and if needed, affordable marketing strategies.

SERVICES OFFERED:

PRODUCT DESIGN

- 3D Computer Aided Design/Drafting
- Electronics Design
- ISO 9001-2000 & 3485 Compliant Design and Documentation
- Manufacturer Assembly Training
- Mold/Tool Design
- New Product Analysis
- Project management
- Prototype Construction
- Rapid Prototyping
- Quality Assurance/Quality Control

PRODUCT COMMERCIALIZATION

- Product Analysis
- Business Strategy
- Market Research
- Patent
- Marketing
- Sales
- Licensing

PRODUCT DEVELOPMENT GROUP

Envision Product Development Group can professionally design, engineer and even commercialize your new product or product line extension.

We'll conduct a comprehensive Market Analysis—an assessment of the market potential of your idea. This includes verifying intellectual property and refining your design. Then, we'll quickly transform your idea into a hands-on prototype or animated virtual 3D model so that we can verify its functionality, manufacturability and cost-per-unit.
